

Full Paper Poster Program

Paper ID	Topic <i>Authors</i>
29	Application of latent heat storage system in thermal power plants <i>Hyo Jae Jeong, Dongho Park, Jong Hyeon Peck, Jae-Hyun Song, Sung Il Kang</i>
41	Simulation and experimental study on refuse derived fuel gasification in a downdraft gasifier <i>Tung Minh Phung, Tien Minh Nguyen</i>
42	Co-oxidation of carbon monoxide and methane under high temperature with monolithic catalyst <i>Chung-Wei Fu, Yi-Hsing Lin, Yu-Lun Lai</i>
44	Effect of initial temperature and initial pressure on upper flammability limit of ethylene/air mixtures <i>Chang Qi, Ye Ning, Yalei Wang, Xingqing Yan, Jianliang Yu</i>
47	The hydrogen generation analysis from dimethyl ether in a novel partial oxidation catalytic fluidized bed reactor using the Kriging surrogate model <i>Chih-Yung Wu, Bo-Wei Wang, Tung-Han Wu, Shih-Peng Chang, Shang-Chih Lin</i>
59	Numerical simulation of solid fuel ramjet combustion with regression model <i>Wen-Hsuan Liang</i>
65	Experimental investigation on plasma-assisted spray combustion of methanol/water mixtures <i>Hai-Hua Chen, Xiang-Xin Chen, Chih-Yung Wu</i>
69	Experimental study of the flame propagation in the porous media for hydrogen-ammonia premixed fuels <i>Chien-Ru Yu, Juan Cerverka, Tien-Chiu Hsu, Chih-Yung Wu</i>
75	Experimental study on ignition of the liquid hydrocarbon fuel in a supersonic flow <i>Po-Kai Chuang</i>

Paper ID	Topic <i>Authors</i>
81	Design and test to a high temperature reheater by hydrogen combustion <i>Fu-Chou Hsiao, Fu-Chou Hsiao, Jing-Yuan Zhou, Jing-Yuan Zhou</i>
89	Numerical modeling of afterburner combustion at two operating conditions <i>Ching-Chi Wu</i>
115	A Tungsten oxide thin film carbon monoxide gas sensor by RF sputtering <i>Hao Yuan Cheng, Ting-Jen Hsueh</i>
127	Effect of louvre hole size on the combustor efficiency <i>Liang-Chun Liu, Chi Chien Wu, Yu-En Wu, Chun-Hua Kuo</i>
135	Emission characteristics of polycyclic aromatic hydrocarbons from five scale of heavy fuel oil fire <i>Chi-Fu Yeh, Ming-Jen Chen, Kuang-Chung Tsai</i>
170	On the laminar flame speed of gasoline-air mixtures with reaction progress <i>Haruki Tajima, Takuya Tomidokoro, Takeshi Yokomori</i>
175	Thermodynamic and economic analysis of a conceptual system combining sludge gasification, SOFC, supercritical CO₂ cycle, and organic Rankine cycle <i>Jiayang Lv, Heng Chen, Kai Zhang, Guoqiang Zhang, Dongke Zhang</i>
198	Experimental study on operating conditions for NO reduction in lab-scale H₂ flameless combustion system <i>Eunji Lee, Jinje Park, Jiho Yu, Sojeong An, Won Yang, Youngjae Lee</i>
245	Study on the iron ore sintering process with flue gas recirculation system <i>Chia-Chen Ho, Hsu Sheng-Yen, Wai Siong Chai, Yi-Sung Huang</i>
247	Optimization of computational fluid dynamics solver on parallel computing systems <i>Donghyuk Shin, Mert Yakup Baykan, Inyeong Gu</i>

Paper ID	Topic <i>Authors</i>
279	Risk assessment and fire dynamics simulation of ammonia as a fuel use in combined cycle power plants <i>Heekyung Park, Min Chul Lee, Dae Jin Jang, Seungyeon Jeong, Seokhui Lee</i>
280	Experimental study on pyrolysis and combustion properties of insulation materials <i>Yejin Ha, Joonho Jeon</i>
296	G-equation solver development for kinematics of turbulent hydrogen combustions <i>Juhun Son, Donghyuk Shin</i>
309	Stage-V regulation compatible propane engine development for medium and large-sized construction machinery <i>Yongrae Kim, Cheolwoong Park, Jisun Choi, Young Choi, Moonyong Jung</i>
315	Effect of hydrogen in nitrous oxide on soot formation inverse diffusion flames: Adding on fuel stream <i>Eka Dwi Ariyanto</i>
